The MD programme has a well-rounded approach to medicine where we learn through lectures, labs, presentations, and group projects. They provide a hands-on approach with clinical and communication skills which lets us dive into the practical element of medicine very early into our studies. I have made friends from all around the world and continue to better myself as an individual through the many extracurricular opportunities that the Medical School has to offer.

Neha Najeeb

MD, Class of 2026, Canada

It is important for medical students to stay updated on residency programme requirements before graduation. I'm grateful for UNIC Medical School's Career and Alumni Office, for keeping us informed about our options and enabling alumni to share their experiences with accessing prestigious residency programmes worldwide. Their stories have helped me understand how to prepare for exams like the USMLE and consider which medicine field to pursue for my training.

Faisal Gharaibeh

MD, Class of 2026, Jordan

DOCTOR OF MEDICINE (MD) UNDERGRADUATE AND GRADUATE-ENTRY OPTIONS

The Doctor of Medicine, prepares our graduates for international medical careers. Accredited by the Cyprus Agency of Quality Assurance and Accreditation in Higher Education (CYQAA) and recognized by the World Federation of Medical Education (WFME), it adheres to the highest international standards.

The student-centred curriculum fosters early development of clinical skills and reasoning, encouraging collaborative learning, critical thinking and reflection - key skills for a future career in medicine. Students benefit from an advanced learning environment, featuring facilities like the anatomy centre with real human cadavers, a clinical skills laboratory, and a library dedicated to health studies.

The **6-year undergraduate entry option** is designed for high-school leavers whereas the **5-year graduate entry option** for those with a prior degree in any discipline.

The Medical School is part of the University of Nicosia (UNIC) dynamic community, which attracts over 12,500 students from more than 100 countries. Located in Nicosia, the capital of Cyprus, an EU-member state, UNIC's main campus is ideally situated for students who can enjoy a high-quality European lifestyle at a more affordable cost, compared to other European Union countries. In addition, Cyprus is known for its warm hospitality, and offers international students a welcoming and inclusive environment, ensuring their experience is both comfortable and enriching.

UNIC Medical School admits students from all around the world providing an environment that enables me to communicate and work with people from many different cultural backgrounds. This significantly increases human understanding, removes stereotypes and enhances cultural awareness - qualities vital in our future roles as doctors.

Mats Israelsson

MD, Class of 2025, Sweden

One of the things that I particularly like about the Medical School is the opportunities we have to contribute to the society by volunteering through the Mobile Clinic. The Mobile Clinic expeditions, which are very popular among the medical students, take place twice a month in rural/remote areas and offer free diagnostic tests.

Eva Sonja Bender

MD, Class of 2028, Switzerland
